

Lab VM walkthrough

1. VM Guide

1.1 For Accessing Terminal

1. Once after you login into your VM using RDP you will see the home screen.
2. For opening terminal click the terminal icon.

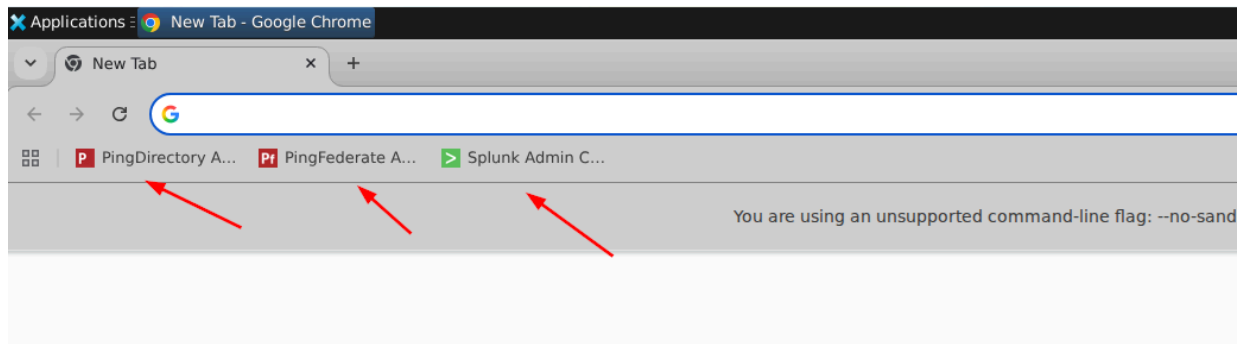

1.2 For Accessing Chrome Browser

1. In the VM home screen click the Chrome icon to access the Chrome Browser.

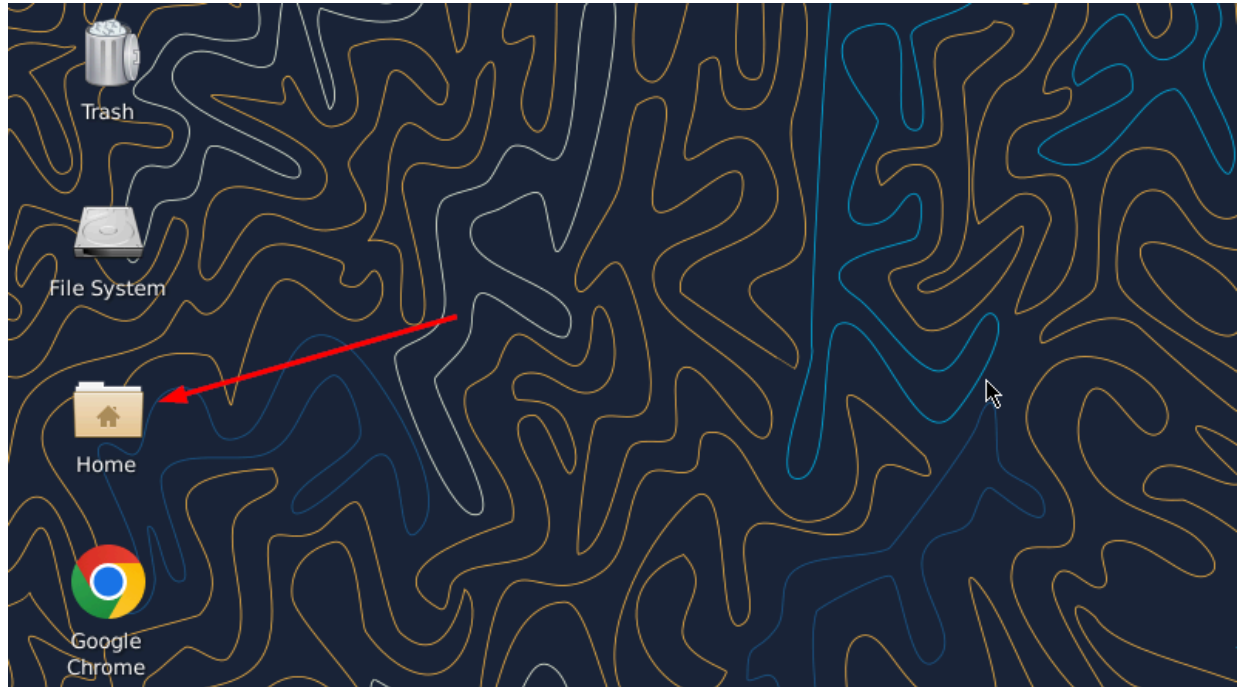

2. In the Chrome Browser The **PingFederate**, **PingDirectory** and **Splunk** console pages will be bookmarked.

Note: The PingFederate and PingDirectory will be up and running when you start the VM but to access the Splunk webpage the splunk app needs to be started which you will do in the following lab sessions

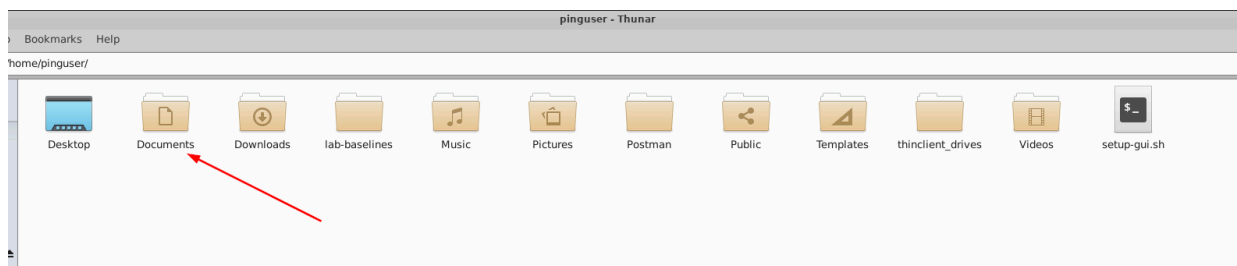

1.3 Folder Structure

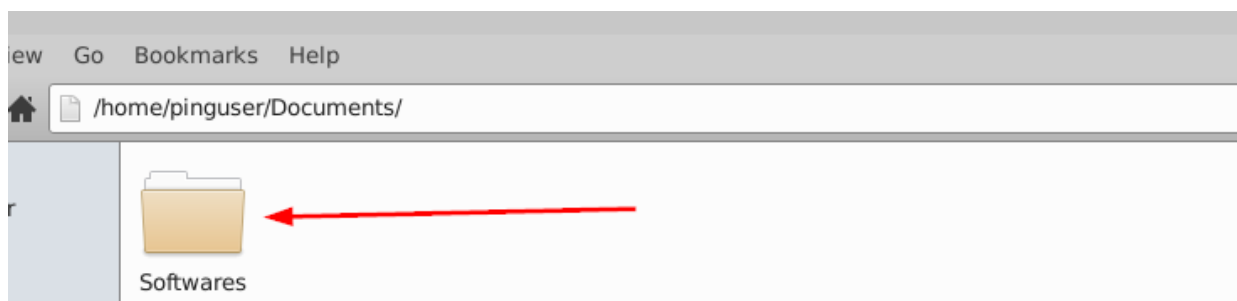

1. In the VM Home screen click the **Home** folder.

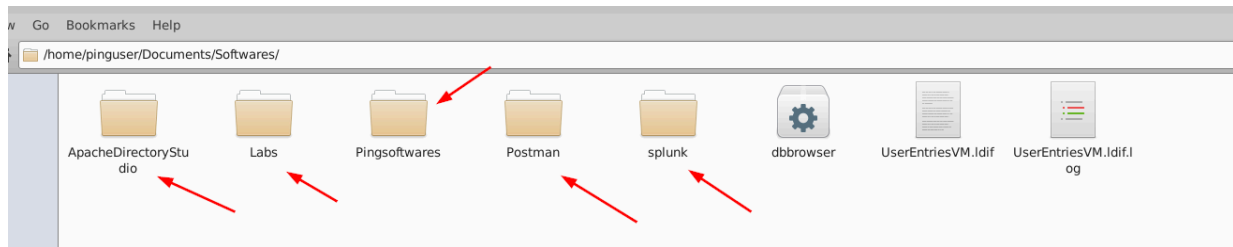

2. In the Home folder click the **Documents** folder.

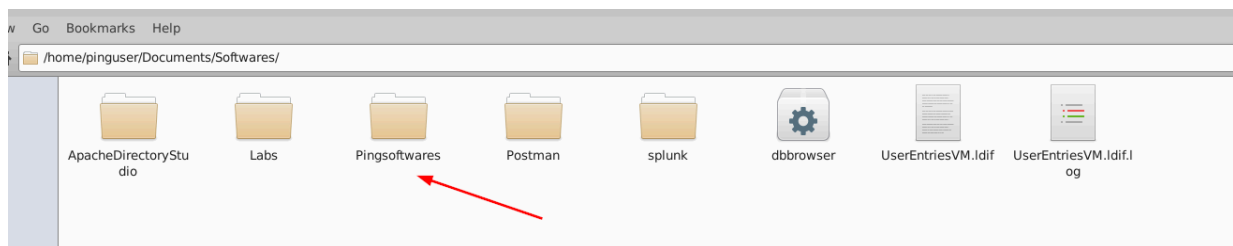

3. Inside the Documents folder click **Softwares** folder.

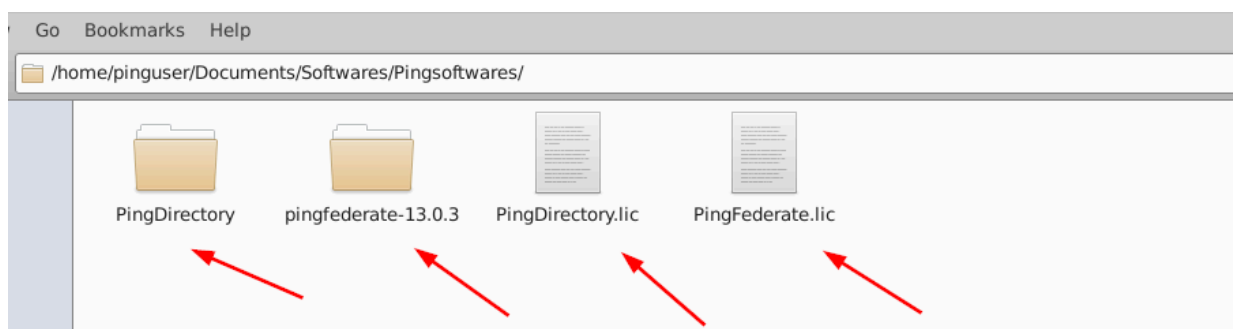

4. The Software folder contains **ApacheDirectoryStudio**, **Postman**, **Pingsoftwares**, **Labs**, **splunk** folders.

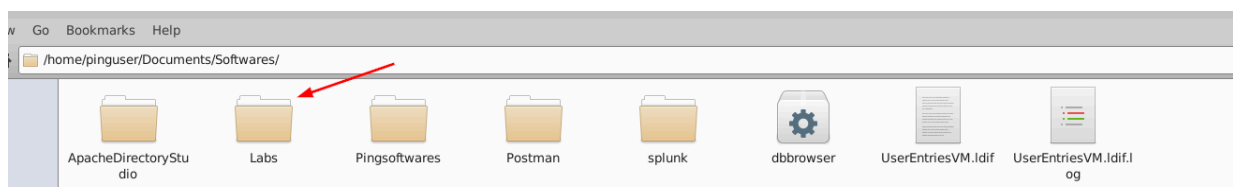

5. Inside the Softwares folder click **Pingsoftwares** folder.

6. The Pingsoftwares folder contains **PingDirectory**, **PingFederate** and its **appropriate licenses**.

7. Go Back to the Softwares folder and click **Labs** folder.

8. The Labs Folder contains all Lab application folders ranging from **Lab01** to **Lab12**.
